

# FUSE

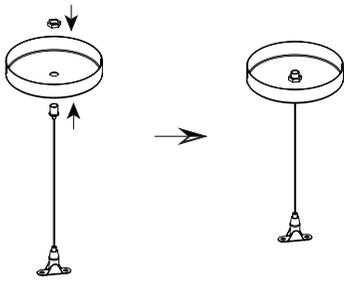

## LINKABLE LINEAR

### LINEAR SERIES

#### PENDANT MOUNT INSTALLATION GUIDE

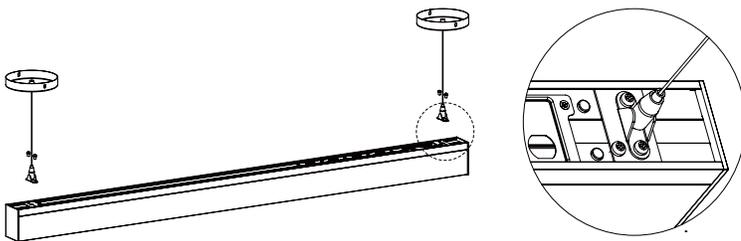

#### STEP 1.

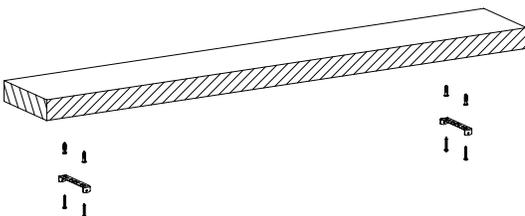

Take out the two canopies, insert the suspension cables in and fasten them with M9 nuts.

#### STEP 2.

Use M5 x 6 screws to attach the suspension cables to the two movable brackets of the fixture.

#### STEP 3.

Use anchors and self-tapping screws to fix the two crossbars on the mounting surface.

## LINKABLE LINEAR

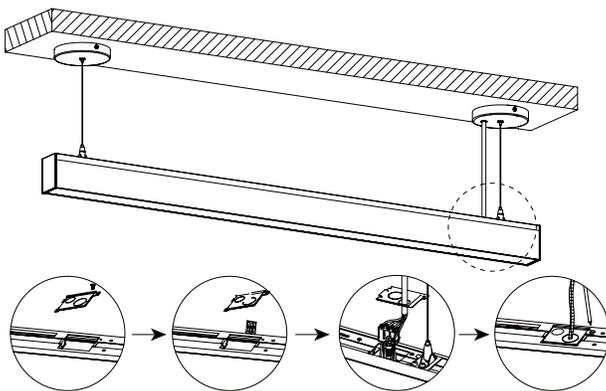

### LINEAR SERIES

## STEP 4.

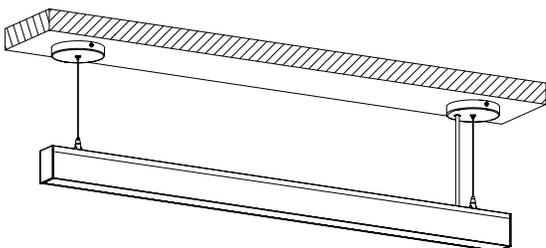

Thread the power cable (provided) through the canopy with power feed hole and wiring in the J box (not provided), Black=L, White=N, Green or Yellow/Green=C, Purple=Dim+, Pink=Dim-. After the wiring is done, use M4x8 screws to fix two canopies to the crossbars.

## STEP 5.

Open the back cover on the fixture and take out the terminal block, thread another end of the power cable to the outlet of the back cover to make wiring, plug white wire into terminal N, black wire into terminal L and green wire into grounding terminal, pink and purple wire are for dimming purpose, leave them alone if not use dimming. After the wiring is done, attach the back cover to the fixture.

## STEP 6.

Adjust the height of the fixture by press the button on the gripper, pull or push the cable carefully to raise or lower the fixture. Then turn on the electricity to verify your successful installation.
